-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

The rejection filed 11/17/04 has been withdrawn.

Claim Objections

Claim 1 is objected to because of the following informalities:

As to claim 1, line 9, "the cover plate" should be --a cover plate--.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin et al. (4321887) and further in view of Conley (3810444).

As to claim 1, Martin et al. discloses a manure scraper (auger) arranged in each tier underneath each cage (11-18); an open space between the cages (fig. 1; the space between the cages); a passage (read as an opening) in the cover plate (25) of the

Art Unit: 3644

manure pit (28). Not disclosed are manure scrapers arranged on a cable that circulates around idler pulleys and driven back and forth. Conley, however, discloses scrapers (30) arranged on a cable (66) that circulates around idler pulleys (69) and driven back and forth (col. 2, lines 2-11). It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the device of Martin et al. with the scraper means of Conley to create a flat scraper surface that contacts the surface area of the flat manure plate below each cage.

As to claim 3, disclosed is a manure plate (29) below each cage.

As to claim 4, disclosed are the upper most cages (11 and 12) connected to each other (20).
